

Advance your career in just ONE year.

Tablet PCs. Social media. Collaborative learning. Technology is changing the face of education. Pepperdine University's Learning Technologies program is designed to help **working professionals like you** prepare for the future of education.

Whether you're looking to advance your career, discover new ways to integrate technology into the classroom, or build a cohort of peers, Pepperdine University's **Master of Arts in Learning Technologies** program empowers real people in real classrooms.

[Watch our program video](#) to learn how our program will prepare you to lead in a technology-rich environment.
